Closing Session – Things to take away

You're going to have to change to fit into the system.  
Or how about you change the system so we can all fit?

No thanks!  
We are too busy.
What we take away from these two days

• No macro change if meso, micro and nano doesn’t present the irresistibility of what is needed – there is no sustainable business in an unsustainable world!

• Reporting, Accounting, Data Blueprint outcomes present themselves in New Business Model Blueprint for the purpose of creating integral business models, giving eight characteristics, a ready-to-use template and case examples

• Mount ThriveAblity – once – climbed – will continue to be a challenge, as many others will also need to be guided by the sherpas – YOU!

• Transformation Journey is our embracing offer for implementation – TOGETHER!

• Thresholds & Allocations are essential, yet a generally untouched area – GTAC MUST HAVE!

• The Commons Revival – Elkington, Bouwens, Wahl, Quilligan, stretching our boundaries even more – the next horizon – a new economic model, based on new social contract, will continue to challenge towards ‘ultimate end’

• Brain rollercoaster! The new will present itself naturally, question is just – WHEN!?!
